DEPIT

TREE VIEW FOLDERS.

The Tree View Folder has 3 different tabs that organize all the materials in:

Lessons.
It contains the logical structure from the school to the single activity.

My materials.
it could be used by the teacher to organise her files.

Shared with me.
You can use it to access folders that other users have shared with you.

MODULE 3
Between magic and immagination

Info&details | Lessons

DEPIT

TREE VIEW FOLDERS.

Each tab contains materials or lessons. The difference, compared to the "list" view, is the presence of others containers above the maps levels (curriculum, modules, etc.), in other words simple folders that can organize better the material/lessons of the teachers.

App
for whom is it useful?

App, for whom is it useful?

	NO interactive Whiteboard	Interactive Whiteboard	Interactive Whiteboard + tablet for students	Interactive Whiteboard + tablet for students + wifi
The App is **useful for the teacher.** It could be used to design curriculum, lessons and activity.	✓	✓	✓	✓
The App can be used to **present maps and materials to the students** in the classroom		✓	✓	✓
The students can use the map in the classroom with their Tablet/Notebook and follow their personalised learning path. No personal account.			✓	✓
The students could **interact with the teacher online using the App.** They may have a personal account for the App in the Cloud.				🙁 technically possible but not doable in this project
